GETTING SOCIETIES ACTIVE

WITH TRAINING FOR EVERYONE

KOMPAN

SPORT & FITNESS

THE WORLD HAS CHANGED. PHYSICAL ACTIVITY LEVELS HAVE DROPPED AND HEALTH CARE COSTS ARE INCREASING

The increasingly sedentary nature of everyday life is resulting in communities with alarmingly low levels of physical activity.

Globally, over 25% of all adults and over 80% of adolescents fail to meet even the ***minimum*** amount of recommended physical activity. The price is high, and everyone is paying - individually and as a society.

The costs of diseases related to inactivity, dependency and lost productivity are weighing us all down.

We should no longer ask ourselves IF we need to act – but rather HOW.

KOMPAN SPORT & FITNESS INSTITUTE

BACKGROUND RESEARCH

Physical inactivity: Among the 4 leading risk factors for global mortality.

Obesity and overweight: 39% of the global population is either overweight or obese; by 2050 this will be 50%.

Cost of obesity: Is equivalent to armed war or smoking.

Aging: 12% of the global population is over 60 years old; by 2050 this will be 22%.

Urbanization: 60% of the developed world lives in cities; by 2050 this will be 80%.

SOURCES: McKinsey Global Institute; UN (United Nations); WHO (World Health Organization)

KOMPAN SPORT & FITNESS INSTITUTE

This is a newly established institution that develops products and training concepts for everyone using insights from a combination of training experts, user needs and customer demands.

BACKGROUND RESEARCH

MAIN BARRIERS TO PHYSICAL ACTIVITY

Lack of **time**: 56%.

Cost of health clubs: 33%.

Need of a **trainer** to motivate: 17%

Lack of offering in the **community**: 39%

KEY OPPORTUNITIES

59% of the population wants to exercise more.

40% of all physical activity takes place outdoors and 25% on the way between home and work, school or shops.

31% of smartphone users use apps to improve fitness.

Activity Tracking is the most wanted smartwatch feature.

SOURCES: Akers, A., 2012. Visual Color Perception in Green Exercise: Positive Effects on Mood and Perceived Exertion. Environmental Science Technology, 21:46(16), 6881-6.; European Barometer 2014; KOMPAN Sport & Fitness Institute; McKinsey Global Institute; MEF (Mobile Ecosystem Forum); The Retention People; UN (United Nations); WHO (World Health Organization)

TO OVERCOME BARRIERS: MOTIVATE, STIMULATE, ACTIVATE

KOMPAN's own research shows that the desire to get active is there but unnecessary obstacles are getting in the way, resulting in a downward spiral. **Time, money and motivation** are the main reasons given for not being more active and socially disadvantaged groups are especially affected.

A low income can be linked to less free time, limited access to leisure facilities and living environments that are unsupportive of physical activity. This is a valuable insight, as **KOMPAN research** shows that a significant 60% of people don't feel that today's public spaces actually inspire them to be physically active.

To get inactive people active, communities require accessible and effective training locations suitable for all ages and physical abilities, along with appropriate instruction, stimulation and motivation.

KOMPAN solutions focus on the inactive.

Research indicates that having digital or physical guidance increases exercise effectivity and perseverance. This support can make all the difference, opening up the road to a better life.

HEALTHIER PEOPLE STRONGER COMMUNITIES BETTER ECONOMIES

Getting fit is so much more than an end in itself - it is a means to a better life. Regular physical activity strongly improves health, social connectedness, employability and productivity.

Together we can activate people and communities by offering fun and dynamic training solutions that ***transform short term changes into long-lasting results.***

The joy of movement shines through in all stages of life and in all layers of society. Communities become stronger and people are able to enjoy a considerably higher quality of life and remain self-reliant up to a very old age. The list of benefits is endless...

BENEFITS OF AN ACTIVE SOCIETY

MOTIVATE AND SUPPORT USERS THROUGH ALL STAGES OF EXERCISE WITH THE KOMPAN APP

USER FUNCTIONS

- Location-specific training programs
- 3D animated exercises
- Find a local trainer
- Progress tracking
- Nutrition
- Club community
- Challenges & rewards

EFFECTIVE AND SUSTAINABLE THREE-LAYER TRAINING SOLUTIONS

With a vision to get an inactive world moving, KOMPAN has incorporated what is needed to overcome barriers to physical activity into product and concept development, resulting in an intelligent three-layer training solution.

1. TRAINING LOCATIONS

Carefully chosen combinations of training equipment and surfacing that allow for hundreds of different exercises and programs for everyone.

2. TRAINING APP

To allow users of all ages, fitness levels and abilities to make optimal use of the training locations, KOMPAN offers the support of a fitness app. The app functions as an online personal trainer, guiding users on exercise and nutrition while motivating them to stay active.

3. TRAINER

KOMPAN believes the presence of on-site trainers will make all the difference to fully benefiting from the training potential and achieving optimal perseverance.

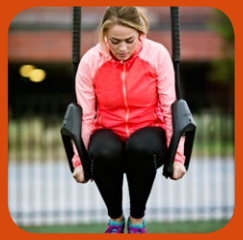
KOMPAN
SPORT & FITNESS

INDIVIDUAL AND GROUP TRAINING: EMBRACING POPULAR ACTIVITY TYPES

Based on market insights, KOMPAN has identified the four most popular training types and transformed them into accessible training solutions.

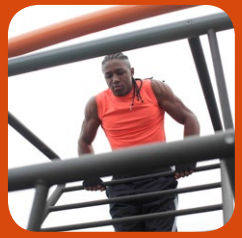
CIRCUIT TRAINING

A classic form of training that combines resistance training with aerobics, targeting all elements of fitness. Exercises are completed consecutively, after a specific number of repetitions or amount of time.



CROSS TRAINING

A very effective form of training that mixes and matches the best of various sports, resulting in diverse and complete training sessions.



STREET WORKOUT

A physical activity that symbolizes freedom of movement and encourages socializing. It is a combination of athletics, calisthenics and other sports, and is mostly performed in a public space.

BOOTCAMP

A group-training program that is inspired by military-style training, and designed to build strength and general fitness through a variety of high-intensity interval exercises.

KOMPAN SOLUTIONS FOR ALL AGES AND ABILITIES

Training packages that accommodate individual and group training needs and demands for all ages, corresponding to the most popular activity types.

PLAY SPORTS

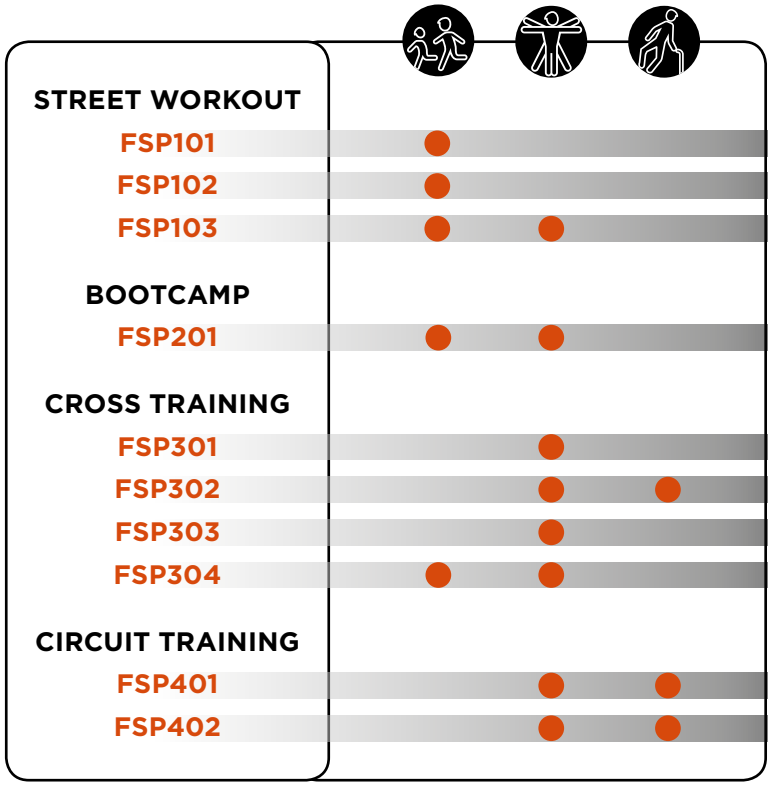
A playful way to train and socialize with a focus on fun, challenge and creativity. A physical activity where people forget that they are actually exercising.

SPORT & FITNESS

This is training for everyone. Aimed at achieving personal goals and social engagement.

ACTIVE AGING

Training balanced to support a healthy, self-reliant lifestyle while offering a place for seniors to meet and be together.



LIFE-COURSE SOLUTION

All solutions are designed with a supportive KOMPAN app and optional trainer support – to make sure that motivation and perseverance are an integrated component to ensure success. These are just a few of the solutions available. Together with the customer, and ideally with community users, KOMPAN customizes location-specific solutions.

PRODUCT FEATURES

1) The unique Magnetic Bells provide safe and functional free weight training in the outdoors. The weights can move freely and are equipped with a magnetic breaking system that prevents the weights from dropping to the surface and slows down the fall to a reduced pace.

2) Suspension trainer with new ergonomically shaped handles for optimal grip and comfort. Innovatively designed, it is the first outdoor solution compliant to safety standards.

3) FLEXOTOP creates a seamless hardwearing surface featuring rapid drainage and shock absorption. Applying surface patterns will significantly maximize on training potential by offering even more exercise opportunities.

4) Polyurea coating is highly durable against wear and tear, offers isolation and simultaneously gives users an outstanding grip during their workout.

5) The Core Twist features 2 poles designed to effectively train all the core muscles in a functional way. An innovative breaking system allows users to determine resistance by changing speed of movement.

6) The 2-sided instruction signs are made of 6 mm polycarbonate sheets that feature illustrations of the most relevant exercises and comes with a QR code connected to the KOMPAN training app.

TRAINING FOR EVERYONE ENJOY THE BENEFITS OF PLAY AND MOVEMENT

Play, movement and health and wellbeing are at the core of KOMPAN's DNA. For over 45 years KOMPAN has been designing unique play solutions for children of all ages.

It has always been KOMPAN's ambition that, as children and adolescents evolve into adulthood, they preserve the joy and health benefits of movement. With healthy and happy adults as role models, children of the future will be all the more likely to follow their lead – creating an ongoing legacy of movement.

KOMPAN's mission is for all people and communities to enjoy the benefits of play and movement, a mission shared with governments, local authorities and organizations all over the world. It is commonly understood that the world needs a collective approach - and KOMPAN is excited to join forces. Expert knowledge of play, movement and training, combined with comprehensive market insights, makes KOMPAN the ideal partner for co-creating training solutions that will enable people and communities to get active and stay that way – throughout all stages of life.
